## AXIAL FLOW FANS

### AXIAL FANS (Stainless Steel Casings)

These Axial Fans are used for ventilation of small enclosures with short ducts and offer a wide range of solutions to ventilation problems.

#### Construction

Stainless Steel casing, stainless fittings, Aluminium motor and polypropylene, adjustable pitch impeller completes a non-corrosive unit.

Ref	Model	Diam mm	Speed rpm	Volts V	Hz	m3/hr	Watts W	dB(A) 3 mtrs
1	AF300-4-1	300	1300	230	50	1800	230	50
2	AF350-4-1	350	1300	230	50	2700	230	58
3	Af400-4-1	400	1300	230	50	3600	230	59

(All casings—Stainless Steel)

### Axial Fans—Hot Dip Galvanised Casings

**AXIAL FANS** in the 500mm to 1200mm range are available on application.

Pacific Fans Limited can assist customers and potential customers in fan selections for particular applications. **Performance curves** and **technical data** will be provided, along with quotations in specific cases.

#### **Construction**

**Standard casings** are of hot dipped galvanised steel, (HDG), designed for direct drive.

**Impellers** are either Polypropylene or Aluminium, depending on particular applications. Blade pitch angles are adjustable from 8° to 32°.

**Motors** complying with the appropriate Standards for single and three phase power supply are available in specific cases and details will be supplied on application.
